Experience

Software Development Engineer Jan 2026 – Present
EazyDiner *Gurugram*

- Revamped 3 customer-facing workflows serving 600K+ weekly active users, optimizing Next.js rendering, API orchestration, and data fetching across high-traffic restaurant pages.
- Built reusable React/Next.js components and shared UI patterns, improving maintainability and accelerating feature delivery by 30% across customer-facing workflows.
- Expanded automated frontend test coverage to 60% using Jest and Playwright, covering critical user flows across browsers and devices.
- Reduced initial page load time by 25% through lazy loading, optimized data fetching, and caching of stable restaurant data across high-traffic customer pages.

Software Development Engineer – Intern Aug 2024 – Dec 2025
UniSphere *Gurugram*

- Shipped React.js components used by 4,000+ users, contributing to a 30% reduction in average student query resolution time.
- Collaborated with a 6-member team to optimize frontend performance, reducing page load times by 40% while supporting 2× growth in application traffic.

Junior Development Engineer – Intern Apr 2024 – Jun 2024
DeployH.AI *Remote*

- Implemented authentication, RBAC, user lifecycle management, and admin workflows across Dashboard, Admin Panel, and Employee Management modules.

Open Source

Juspay Hyperswitch | *Rust, Redis Streams* | PR #13690 (Merged) Sep 2026

- Fixed a Redis Streams consumer leak in the Hyperswitch payment scheduler by stabilizing consumer identity across polling cycles, reducing consumer registrations from one per poll to one per process restart.
- Added per-tenant consumer cleanup during graceful shutdown with fault-isolated error handling and integration tests covering both redis-rs and fred backends.

Projects

Staffmate | *Next.js, React, TypeScript, Prisma, PostgreSQL, Tailwind CSS, AWS S3* | GitHub | Live

- Built a production-grade, multi-tenant HRMS platform for a plastics manufacturer covering employee management, attendance, leave, payroll, and payments.
- Designed a relational data model and layered architecture (domain, application, infrastructure) with repository interfaces, decoupling business logic from Prisma.
- Built inventory and production analytics with purchase/sales ledgers, stock-on-hand dashboards, and KPI views, plus automated PDF reports for payroll and attendance.
- Implemented Google OAuth, Argon2id password hashing, email verification, RBAC, and company-level feature flags; integrated AWS S3, transactional emails, and PWA support.

Code-Edit | *Node.js, Express.js, React.js, MongoDB, Socket.IO, JWT, Docker* | GitHub | Live

- Developed a full-stack collaborative IDE with WebSocket-based real-time editing, user presence, chat, and JWT auth.
- Designed a Docker-based sandboxed code execution engine with concurrent processing and real-time output streaming.

Technical Skills

Languages: JavaScript, TypeScript, C++, Python, Rust, SQL
Frontend: React.js, Next.js (SSR, SSG), Redux, HTML, CSS, Tailwind CSS, Responsive Design
Backend: Node.js, Express.js, REST APIs, WebSockets, JWT Authentication
Databases: PostgreSQL, MongoDB, Redis, SQLite, Query Optimization, Indexing, Data Modeling
Cloud & DevOps: AWS (EC2, S3), Docker, GitHub Actions, CI/CD, Firebase
Testing & Tools: Jest, Playwright, Git, Postman, Webpack
GenAI: LLM APIs, RAG, Embeddings, Vector Search, Tool Calling, Prompt Engineering
CS Fundamentals: DSA, OOP, DBMS, Operating Systems, Computer Networks, System Design

Education

BML Munjal University Gurugram
Bachelor of Technology in Computer Science Engineering *2022 – 2026*
